

27.1.21 (Problem solving)

Can I solve addition word problems?

I know how to use a written method for addition.

I understand the problem and how to solve it.

I can underline key words and numbers.

Use a numberline to answer these word problems. You will need to show your workings on a separate piece of paper.

1.

If you have 72 rubber ducks and are given another 17, how many rubber ducks would you have?

2.

If you find 49 wooden beads under the sofa and then find another 50 in a box, how many beads would you have?

twinkl.com

3.

If you have 47 pennies and you find another 13 in your pocket, how many pennies would you have?

twinkl.com

4.

If you have 38 sweets and buy 19 more, how many sweets will you have?

twinkl.com

5.

If you count 62 sheep in a field and 24 cows,
how many animals are there altogether?

Challenge: Two-step word problem

To solve this problem you could draw some jottings to help or add/subtract the numbers mentally.

John buys 12 pencils one week and 7 the following week. He gives 3 pencils to his friend.

How many pencils does he have left?
