L/O: Can I use a numberline for subtraction?

I know how to use a written method for subtraction.

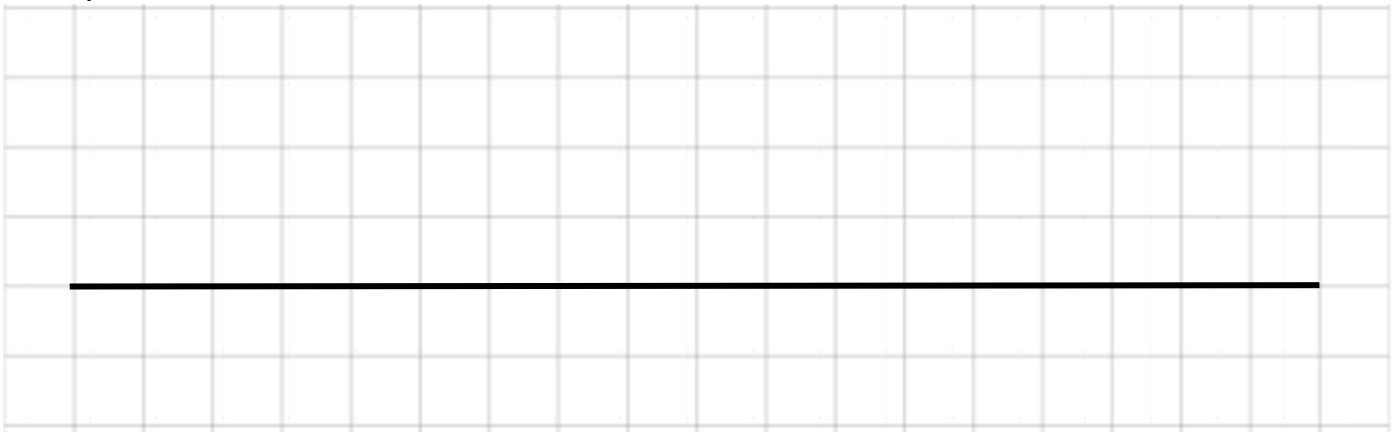

I understand how to draw jumps on a numberline.

I can count backwards in tens and ones.

1) $27 - 5 =$

2) $38 - 4 =$

3) $47 - 6 =$

4) $59 - 8 =$

A grid with 10 columns and 5 rows. A solid black horizontal line is drawn across the grid, starting from the first column and ending at the tenth column, positioned between the second and third rows from the top.

5) $44 - 12 =$

A grid with 10 columns and 5 rows. A solid black horizontal line is drawn across the grid, starting from the first column and ending at the tenth column, positioned between the second and third rows from the top.

6) $65 - 14 =$

A grid with 10 columns and 5 rows. A solid black horizontal line is drawn across the grid, starting from the first column and ending at the tenth column, positioned between the second and third rows from the top.
